Subject: ANIMAS COUNTS

Caroline,

EMAIL

I may be able to come in tomorrow. I have made specific notes about regular emails as I usually do, but I have been making only a number count of ANIMAS emails as I send the appropriate GENERIC response (either general or press). Keeping detailed records as I go would mean that the emails would be piling up instead of being answered. If I'm here tomorrow, I'll try to keep tabs on emails as I go. Yesterday I had to go back through all of the emails to get the specific questions. If I do that today, I'll be doing that instead of answering the emails as they come in. Overall today, my impression of today's emails is much the same as yesterday: mostly companies wanting to be employed by EPA for the cleanup. Otherwise, the overall tone is negative. People say the erweb seems to purposely give no phone numbers for specific contacts in order to dodge the public's questions. Press have questions about the phone # re the daily press conference, wanting to know if it's just phone or will there be a place where they could go to the actual gathering of press people. Some citizens want specifics re their vacation plans and if the specific location is affected. Some scientists want info about specific concentrations of toxics. Some complain that 6654 is full. Even EPA R9 was trying to get Libby Faulk to coordinate but that vm directed her to EISC. Government agencies such as CDPHE, BLM etc have had some questions.

PHONE

Attached is what I will try to do for phone and email going forward. I think most of the

categories are self-explanatory but here are some that may need clarifications:

ENV SPEC person may be asking if Lake Powell or some other specific location is safe

CLAIM means they want money for loss of business, etc

COMPANY means they want to do ANIMAS cleanup for US EPA

FIRE SMCG/ RB means fire Shaun and me!

GOV AGENCY means agency looking for specific info from R8 EPA

SCIENCE means someone like a hydrologist looking for specific info re contaminants and their concentrations

COMMENT means people want a specific place to leave their comments

HELP means people would like to volunteer re ANIMAS

M= Monday, etc and the number beside it means the number of calls on that subject
